Fishery Science: The Unique Contributions of Early Life Stages

336 pp., 9 3/4 x 9 1/2, paperback, ISBN 0-632-05661-4, Price \$52.99

Edited by Lee A. Fuiman and Robert G. Werner

Publication Date: September 2002

***Compiles and
organizes research
information on
the early life history
of fishes.***

A complete understanding of the research on the early life history of fishes is essential to advanced students of fish biology, fisheries, and aquaculture. *Fishery Science* compiles and organizes a wealth of information in this subject area.

Each chapter of the book covers a topic traditionally taught in fisheries science courses, from the point of view of the importance of early life stages. The user-friendly, clear writing style of this well-illustrated book allows for easy absorption of the contents, which include:

- Population analysis
- Habitat requirements
- Fishery management
- Human impact
- Case studies, and other relevant topics

The experienced editors and contributors facilitate in-depth study of this core area, providing a text that will be particularly useful to upper level students of fisheries science and aquaculture.

About the Editors: Lee A. Fuiman, Ph.D., Professor and Senior Research Scientist, Section of Integrative Biology, University of Texas, Austin, Department of Marine Science at the Marine Science Institute in Port Aransas. Fuiman's research is directed toward understanding how processes affecting larval fishes have serious consequences for populations of adults and includes both laboratory and field experiments on the behavioral and sensory capabilities of fish larvae. Robert G. Werner, Professor Emeritus of Environmental and Forest Biology, College of Environmental Science & Forestry, State University of New York, Syracuse. Werner's research focuses on the ecology of fishes, particularly during their early life history.

336 pp., 9 3/4 x 9 1/2, paperback, ISBN 0-632-05661-4, Price \$52.99. Price subject to change without notice. Sixty-day examination copies available to U.S. instructors. Complimentary copies available to reviewers.
